# Minutes of meeting

## User Forum 2022

Teams meeting

03/11/2022 – 03/11/2022

INITIATED BY	WRITTEN BY	PRESENT	ABSENT	FOR YOUR INFORMATION
Michael Belsnes	Eline Opdalshei			

DISTRIBUTION	PRESENT	ABSENT	FOR YOUR INFORMATION
See attendance list	X		

PROJECT NO / FILE CODE	DATE OF DISTRIBUTION	CLASSIFICATION
	03/11/2022	Internal

### AGENDA

- Status on the maintenance project with respect to deliveries and economy (60 min)
  - Fund distribution 2022 (prognosis)
  - Error statistics Updates on new free functionality
  - Administrative information relevant to data management and incident handling EMPS, ProdRisk and SHOP (3x10)
- Break 15 min Recent key project results are presented (45 min)
  - Test system – LTM, Autonomous Planning, Efficiency curves in the models (3x5min)
  - Results and experience from POC of next generation market model (30 min, with demo and experiences)
- Break 15 min
- Presenting roadmaps drafts (3x10)
- Break-out groups, input to roadmaps (30 min)

## MINUTES OF MEETING

**Q: Question**

**A: Answer**

**C: Comment**

- **Status on the maintenance project with respect to deliveries and economy (60 min)**
  - **Welcome /by Michael Belsnes**
  - **Fund distribution 2022 (prognosis)**

Q: How is the budget surplus handled, how are we planning to use it?

A: We are working on hiring more people, both to replace the people who have left and strengthening our teams with additional new hires.

- **Error statistics Updates on new free functionality**
- **Administrative information relevant to data management and incident handling EMPS, ProdRisk and SHOP (3x10)**

Q: How good is the numerical consistency?

A: On some dataset it is very consistent, but it is not tested on all functionality, and with parallel processing there is still some inconsistency.

- **Break 15 min**
- **Recent key project results are presented (45 min)**
  - **Test system – LTM, Autonomous Planning, Efficiency curves in the models (3x5min)**
  - **Results and experience from POC of next generation market model (30 min, with demo and experiences)**

Q: Discussion ngLTM – how?

A: Consortium building, had some one-to-one discussions. Planning a WS or a digital meeting around this. Also working with a new project proposal which is going to be presented to all possible new customers. An executive summary of the end report is underway.

Kyllingstad/Lyse

C: PoC – hard to define the project, SINTEF has proved that can be a professional SW developer. Plug-and-play functionality. Hope more people will join the next step in the development.

- **Break 15 min**
- **Presenting roadmaps drafts (3x10)**
  
- **Break-out groups, input to roadmaps (30 min)**
